FIBER Series

HARTEX

Hartex synthetic fiber cushion is designed for use under stretch-in broadloom carpet and is intended for hospitality and other commercial spaces. The high-density construction prolongs carpet life and provides excellent thermal and acoustical properties.

Benefits:

- Prolongs the life of the carpet and reduces maintenance costs
- Masks surface irregularities better than direct carpet glue-down
- Non-allergenic and odor-free
- Moisture- and mildew-resistant for use below grade
- Provides excellent insulation and acoustical properties

Features:

- 100% pre-consumer synthetic fiber – needle-punched and thermal-bonded
- Features air-permeable construction

Comfort

Tred-MOR® Fiber series carpet cushion is the best value option when specifying a cushion for use in hospitality and commercial spaces. Our blend of synthetic fibers creates a strong foundation offering lasting comfort when used under commercial carpets with moderate foot traffic. Products available for both stretch-in or double-glue applications.

Noise

Performance and noise control are essential in the hospitality and commercial environments. Depending on the floor type, noise can easily be transmitted throughout a room or to an area below by simply taking a step. A separate carpet cushion creates a sound barrier for the subfloor to help reduce the transfer of impact noise to the room below.

Moisture

Fiber carpet cushion, due to its construction, provides for exceptional breathability. This allows for moisture vapor from below to easily pass up through the flooring. Carpet cleaning becomes much easier as air is readily able to vacuum up through the padding up to the carpet to help ensure that maximum cleaning is possible.
